

# HP Quality Center 10 Training

The Quality Center 10 training course gives your QA engineers the necessary skills to utilize the full functionality of Quality Center.

*Genilogix training was beyond excellent. They really know their stuff and did a superior job. We had some pretty sharp people in there and Genilogix was able to quickly and effectively deal with any questions and issues no matter how complex or esoteric – high praise.*

Bill Heinrich, **Harry & David**

## Course Overview

The course focuses on using the main entities for QA, requirements, tests, runs and defects while all other SDLC aspects like version control, release management and reporting are being inserted as best practice guidance.

This course curriculum is being presented through the use of instructional slides, best practice slides, instructional demos and hands-on exercises.

## Course Objectives

For students to be self-sufficient and engaged in the Quality Center platform, to have the confidence and necessary skills to properly build and implement their own requirements, tests, defects in their testing environment.
