

# HP Quality Center / ALM and QuickTest Professional Training

## Web-based Training

Training courses that give your staff the necessary skills to take advantage of the latest features of HP's premier application lifecycle management platform including test automation

### Intended audience

- Quality assurance engineers
- Software engineers
- Support engineers
- Anyone who needs to create, maintain, and report on application lifecycle management or automated testing

### HP-certified / Customer-approved

*Genilogix training was beyond excellent. They really know their stuff and did a superior job. We had some pretty sharp people in there and Genilogix was able to quickly and effectively deal with any questions and issues no matter how complex or esoteric – high praise.*

Bill Heinrich, **Harry & David**

### About Genilogix
